Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2635

1. This Office action is in response to the application filed December 8, 2003. Claims 1-6 are pending.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3 and 5-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shipman 6,467,924.

Regarding claim 1, Figures 7 and 8 teaches a computer keyboard with resilient member (item 19), multiple printed circuit boards (items 21), and illumination board (item 49), and casing (item 13). The transparent layer is shown as item 13. Shipman teaches that the transparent layer does not have to be light transmitting because light may pass upwards through the keys.

However, one of ordinary skill in the art would recognize that a light transmitting top surface would increase the visibility in low light conditions.

Regarding claims 2 and 3, see col. 3.

Regarding claim 5, a transformer for supplying power to an illuminating sheet is conventional. It would have been obvious to use a conventional power source.

Regarding claim 6, the multiple electrical contacts on the printed circuit boards and insulation layer is shown in Figure 7.

Art Unit: 2635

4. Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Albert K. Wong whose telephone number is 571-272-3057. The examiner can normally be reached on M-Th.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Horabik can be reached on 703-305-4704. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
